

# Waste King

C O M M E R C I A L

**BUILT STRONG  
BUILT TO LAST**

**COMMERCIAL DISPOSER SYSTEMS**

### FEATURES

- **EXCLUSIVE STAINLESS STEEL SWIVEL IMPELLERS** swivel and retract at potential jams, thereby reducing costly jams and motor overloads as well as eliminating the need for expensive reversing switches and de-jamming wrenches.
- **STAINLESS STEEL UNDERCUTTER BLADE** located beneath the grind ring, cuts and snips stringy and fibrous waste into small particles to promote free flow through the drain line.
- **HUSH CUSHIONS®** isolate the unit from metal to metal contact, significantly reducing noise levels. Hush Cushions® with built in splash guard, are specially designed to withstand vibration and tension present in the grinding process.
- **VARIETY OF MOUNTING SYSTEMS AND ACCESSORIES** are available to assure the most efficient disposer system for your food waste management needs.
- **FULL ONE YEAR PARTS AND ONSITE WARRANTY.** One full year warranty from the date of purchase by end user, covering defects in material or workmanship. Parts and labor included.

### MODEL WLC-100

#### 2800 RPM

- 3 1/2" to 4" throat opening
- Single phase

**Light Commercial Disposer**

### MODEL 500

#### 1/2 HP

- 6" throat opening
- Single phase
- Adapts to existing mount system

### MODEL 2000

#### 2 HP

- 6" throat opening
- Single or 3 phase
- Adjustable height

### MODEL 3000

#### 3 HP

- 6" throat opening
- 3 phase
- Adjustable height

### MODEL 5000

#### 5 HP

- 6" or 8" throat opening
- 3 phase
- Adjustable height

# STRONG... BUILT TO LAST!

**MODEL 750**

**3/4 HP**

- 6" throat opening
- Single or 3 phase
- Adapts to existing mount system

**MODEL 1000**

**1 HP**

- 6" throat opening
- Single or 3 phase
- Adapts to existing mount system

**MODEL 1250**

**1 1/4 HP**

- 6" throat opening
- Single or 3 phase
- Adapts to existing mount system

**MODEL 1500**

**1 1/2 HP**

- 6" throat opening
- Single or 3 phase
- Adapts to existing mount system

**MODEL 10000**

**10 HP**

- 8" throat opening
- 3 phase
- Adjustable height

**APPLICATIONS**

**Model WLC-100**

Perfect for small kitchens found in pizza parlors, sandwich shops, fast food restaurants, office break-rooms and more.

**Models 500 through 1500**

## WATER SAVING SYSTEMS

### MOUNTING ADAPTERS

Waste King makes an adapter for virtually every new or replacement installation. With mounting adapter rings, you can replace any commercial disposer quickly, easily and very economically!

Our mounting systems adapt to any size opening from a standard 3-1/2" sink mount, to 6" and 8" trough mounts and sink bowls/cones of any size.

No matter which disposer you're replacing, you can easily upgrade to Waste King quality.

### CONE ASSEMBLIES

Choose from a wide variety of cone assemblies, which provide total flexibility in the work place.

Whether the assembly is for use in dish tables, drain boards or an all-purpose configuration, the cones are available in standard 12", 15" and 18" diameters.

- Dish Table (DT) Cone Assembly contains a scrap ring and cone cover with an offset opening.
- Basic Cone Assembly (B) contains the cone and a swirl spray.
- All Purpose (AP) Cone Assembly contains a scrap ring for easy food removal and a silver guard to keep silverware and other heavy objects from dropping into the grinding chamber.

## ELECTRICAL CONTROL OPTIONS

Keep your disposer system running smoothly and efficiently with Waste King's high quality controls... from simple on/off switches to automatic control panels. All controls are tested for durability, quality and long life.

- Electrical control panel boxes PC-1024 and PC-2024 are NEMA 4 rated and built with top-quality #302 stainless steel. The water-saving PC-2024 has a safety interlock and timed water shutoff of 0-6 minutes to allow water to continue running after the disposer is turned off. This provides thorough drain flushing to help prevent clogging without using more water than necessary. If simpler controls are specified, either a manual or magnetic start/stop switch is available.

## WATER QUALITY CONTROL DEVICES

In addition to the water-saving features of the electrical controls, Waste King offers a syphon breaker which prevents any back-flow of water into the water line. To insure that water is always in the disposer when it is running, we offer a solenoid valve which activates when the disposer is turned on. An economical flow control valve is also available to automatically provide the correct amount of water for efficient disposer operation.

Optional spray rinse with automatic shut-off and wall brackets are available for pre-rinse applications.
